in collaboration with  
The Federmann Cyber Research Center at the Hebrew University of Jerusalem  
and  
The Transparency Algorithm Project  
(Freedom of Information Movement & The Law Technology and Cyber Clinic)**

**CALL FOR POSTERS - Responsible AI  
Biannual Cyber Conference  
December 22, 2024  
University of Haifa, City Campus**

We invite scholars and research students to submit an abstract of a poster to be presented at the Biannual Cyber Conference in collaboration between the Center for Cyber Law and Policy at the University of Haifa and the Federmann Cyber Research Center at the Hebrew University of Jerusalem. This year's conference will focus on Algorithmic Transparency, with a posters session dedicated to the wider context of Responsible AI. The Conference will be held in Hebrew, however the submissions and posters can be either in English or Hebrew.

**Applications submission deadline: 14 November 2024.**

## **BIANNUAL CYBER CONFERENCE**

In the current era, we are striving to understand how to develop artificial intelligence in a responsible, transparent, and in a safe manner as possible for humanity. The challenges posed by AI's rapid advancement require a focused approach on ensuring that these technologies align with ethical standards and societal values. As part of our poster session, we are seeking proposals for posters showcasing research on a wide range of topics related to Responsible AI, including but not limited to explainability, transparency, accountability, and ethical problem-solving. We encourage submissions that explore these critical aspects of AI development to contribute to a more secure and equitable future.

The Cyber Conference is held twice a year, reflecting the ongoing collaboration between the two Cyber Centers at the University of Haifa and the Hebrew University of Jerusalem. The conference is designed to address pressing issues across various cyber domains and is inherently interdisciplinary, ensuring that all aspects of a given topic are explored. This annual event brings together diverse perspectives, fostering a comprehensive understanding of the complex challenges in the field of cyber.

## RESEARCH THEME

Research on themes related to Responsible AI, such as explainability, transparency, accountability, ethical problem-solving, or related areas are welcome.

All stages of work are welcome. The research must adhere to ethical standards, particularly in relation to AI, data use and human subjects. The research must contribute new insights or advancements in the field of Responsible AI. The poster should clearly present the research objectives, methodology, results (if applicable) and conclusions or ongoing work.

## APPLICATION SUBMISSION AND DEADLINES:

Applications should include:

- Poster Proposal: A detailed abstract in English or Hebrew (up to 500 words) describing the research.
- A short Bio (up to 100 words) of the submitter/s.

Submissions should be sent to [cyber@univ.haifa.ac.il](mailto:cyber@univ.haifa.ac.il) and received **by 14 November 2024**.

Decisions expected **by 30 November 2024**.

For any additional questions, please contact us: [cyber@univ.haifa.ac.il](mailto:cyber@univ.haifa.ac.il)

## ABOUT THE CCLP

The CCLP was established by the University of Haifa in collaboration with the Israeli National Cyber Directorate. The purpose of the CCLP is to develop the interdisciplinary academic capacity necessary to advance cutting-edge research with theoretical and practical implications and to inform public policy in Israel and around the globe on cyber, law and policy issues. Within the CCLP, a sub-center for the study of the technology, law and policy related to biometrics has been established. For more details please visit: [www.cyber.haifa.ac.il](http://www.cyber.haifa.ac.il)

## ABOUT FEDERMANN CYBER SECURITY RESEARCH CENTER – CYBER-LAW PROGRAM

The mission of the HUJI Cyber Security Research Center (Law Program) is to advance both basic and applied research and to develop advanced technologies in order to improve cyber security. The Cyber Law Program aims to advance research regarding regulations used to protect cyber space and activities within it against misuse and abuse, and to fight cyber-crime and cyber-attacks

while focusing on the following areas: international law, human rights, law and technology, and criminology.
